

2019 COMMUNITY FISHING GUIDEBOOK

Arizona's Community Fishing Program motto is:
**"If people can't get to the fish,
we'll bring fish to the people."**

We take great pride in providing a fun, family-friendly fishing opportunity at city park lakes and ponds across Arizona. For 34 years, we've been providing excellent customer value through the consistent, reliable delivery of quality fish throughout the year. We will continue to work with new communities to bring more fish to more waters for more people.

45 waters to fish!

As of 2019, we have established fishing waters in
21 Arizona communities.

For more detailed information on specific locations of the Community Fishing Waters see the lake and park maps within this Guidebook. You can also find additional information at www.azgfd.gov or pick up a copy of the 2019 Arizona Fishing Regulation booklet at your local license dealer.

Fish Stocked in Community Fishing Waters

(see specific waters for delivery schedules)

PHOTOGRAPHY BY GEORGE ANDREJKO

The Arizona Game and Fish Department is the state agency charged with conserving and managing Arizona's fish and wildlife resources. Its money comes from the sale of licenses, permits, fees and federal excise taxes on firearms, ammunition and fishing equipment and boats. Policies are decided by the Arizona Game and Fish Commission, whose members are appointed by the governor.

The Arizona Game and Fish Department prohibits discrimination on the basis of race, color, sex, national origin, age, religion, or disability in its programs and activities. If anyone believes that they have been discriminated against in any of the AZGFD's programs or activities, including its employment practices, the individual may file a complaint alleging discrimination directly with the Director's Office, 5000 W. Carefree Highway, Phoenix, AZ 85086-5000, 602-942-3000, or with the U.S. Fish and Wildlife Service, Attn: Civil Rights Coordinator for Public Access, 5275 Leesburg Pike, MS:WSFR, Falls Church, VA 22041-3803. Persons with a disability may request a reasonable accommodation or this document in an alternative format by contacting the Director's Office as listed above.

Welcome to Arizona's Community Fishing Program

Whether you are an experienced, occasional or new angler, the Arizona Community Fishing Program offers fishing opportunities that you are sure to enjoy. There are currently 45 city park lakes participating in the Program, a partnership between the Arizona Game and Fish Department and 21 cities across the state. Detailed maps and park-specific information on all Community Fishing waters are found on pages 18–72. To ensure fishermen have a good chance of catching fish, plenty of ready-to-catch fish are stocked during the fall, winter and spring seasons.

More than 4 million Arizona residents live within a 20-minute drive of a stocked Community Fishing Program lake. Close by and convenient, all the parks offer parking, restrooms and other amenities to make your fishing trip and park visit enjoyable.

Why fish community lakes?

- All lakes are regularly stocked
- Lakes and parks are well maintained
- Fishing is a fun and rewarding sport
- Anyone can fish
- Fishing is relaxing and peaceful
- Parks are pleasant and safe environments
- Fish are safe to eat and good for you

Distinctive Community Fishing Program signs are posted at key locations at all participating waters, uniquely identifying these fisheries from other city waters. The signs also highlight the fishing license requirements and special bag limit regulations that apply to Community Fishing waters.

2019 Changes & Highlights

Four more waters were added to the Community Fishing Program in 2018:

- MANSEL CATER OASIS LAKE in Queen Creek
- YAVAPAI LAKES in Prescott Valley (Urban Forest Park)
- FAIN LAKE in Prescott Valley
- PACIFIC AVENUE ATHLETIC COMPLEX (PAAC) POND in Yuma

Fain Lake has been stocked for years by the Department and routine stockings of trout from Department hatcheries shall continue with the addition of at least 4 stockings using vendor-purchased trout from Colorado sources. Pacific Avenue Athletic Complex will also receive periodic stockings of trout from Department hatcheries in addition to vendor-purchased trout from Colorado sources. That equates to more fish in more places!

The City of Queen Creek built an exceptionally beautiful new park to service the growing community, and they requested that it be added with a robust stocking strategy. Thus, Mansel Carter Oasis Lake is the first new “Core Water” we’ve added to the program since 2014. Additional fishing waters are still being planned in Peoria, Gilbert, Avondale, and Glendale, as well as several rural communities.

Yavapai Lakes, Prescott Valley

Community Fishing Regulations at a Glance

The Game and Fish Commission specially designates certain municipal lakes and ponds as Community Fishing Program waters. These waters have their own special rules and regulations. Here are some key Community Fishing regulations anglers should be aware of.

License Requirements: All persons 10 years or older, while fishing any public fishing water in Arizona, must have on their person a current Arizona fishing or combination (combo) hunt and fish license. Community Fishing Program waters require any of the following license types.¹

AGE	LICENSE TYPE	FEE	
		RESIDENT	NON-RESIDENT
Under age 10	No license required		
Ages 10 – 17	Youth Combo Hunt/Fish	\$5	\$5
Age 18 and over	Community Fishing	\$24	\$24
	General Fishing	\$37	\$55
	Combo Hunt/Fish	\$57	\$160
	Short Term Combo Hunt/Fish <i>Valid one day only</i>	\$15/day	\$20/day
Age 70 and over and AZ resident past 25 years	Pioneer – Combo Hunt/Fish <i>Available only from Game and Fish offices</i>	Complimentary	N/A

¹Other valid licenses include blind and disabled veteran complimentary licenses, and youth-group two-day fishing license.

ALL Arizona fishing and combo hunt/fish licenses:

- Are valid for one year (365 days) from date of purchase.
- Include Community Fishing privileges, valid at any of the waters found in this guidebook.
- Include the two pole privilege, allowing for the simultaneous fishing with two poles (lines) in the water at once. This privilege applies to Community Fishing licenses also.
- Are valid for ALL fish species including trout.

Licenses can be purchased at any one of 320 convenient sporting goods or retail dealers statewide, any Game and Fish office, or online at www.azgfd.gov.

Operation: GAME THIEF
Report Violators
 Call 24/7, 1-800-352-0700

Bag and Size Limits

Most Community Fishing waters are designated either as a lake or a pond and have different daily bag limits. Lake or pond status is specified throughout this guidebook and on signs posted at each park.

FISH SPECIES	DAILY BAG LIMITS		MINIMUM SIZE LIMIT
	Lakes	Ponds	
Catfish	4	2	None
Trout	4	2	None
Bass	2	1	13 inches or more
Sunfish: <i>various species including bluegill, redear, green and hybrid</i>	10	5	None
White Amur (grass carp)	1	1	30 inches or more
Other	None	None	None

The daily bag limit is the maximum number of fish that may be legally caught and reduced to possession in one day. Once you catch a fish and do not release it, it now counts toward your daily bag limit. This includes any fish you catch and give away to someone else. Daily bag limits are for 24-hour periods (midnight to midnight). **Once your daily limit is reached, you must stop fishing for that species.**

Method of Take, Use of Bait

Angling:

- All fishing and combo licenses allow the angler to fish with two poles or lines simultaneously. In no case are more than two poles allowed to be used at the same time.
- Anglers may have no more than two hooks, or one artificial lure with more than one hook attached, or two artificial flies or lures, attached to the same line or pole.
- No snagging or use of seine nets, cast nets or dip nets to capture sport fish.

Other:

- Park rules and regulations vary by city and are identified on signage at each park. Posted open park hours are also the times that anglers may fish.
- When fishing, Game and Fish laws require you to attend your line, that is, stay near your fishing pole at all times.
- When fishing, the hook, fly or lure must be used in such a manner that the fish voluntarily attempt to take it in their mouths.
- It is a violation to fail to keep all edible portions of fish in an edible condition or to

leave fish to die. This is wasting “game” meat.

- It is illegal to transport live fish from a lake or to transfer live fish from one body of water to another. Unauthorized stocking of fish, minnows and crayfish is illegal.
- **The use of live bait fish (such as minnows) is illegal at all Tucson area lakes (Silverbell, Kennedy, Lakeside and Sahuarita), and also at Green Valley Lakes in Payson.**
- It is a violation to litter. This includes hooks, fishing line, bait containers, wrappers, etc.

All About Fish Stockings

Stocked Fish

Catfish – Ready-to-catch channel catfish averaging 1.5-2 pounds (14-18 inches) are stocked during the warmer seasons in the spring and the fall. Farm-raised catfish are delivered by contracted fish suppliers based in Arkansas.

Trout – Catchable rainbow trout from 10-13 inches are stocked during the winter season from three sources. Two Colorado-based trout farms are contracted to supply most of the trout. Game and Fish state trout hatcheries will continue to stock fish into Tempe Town Lake and the four Yuma area waters.

Bluegill or Redear Sunfish and Largemouth Bass – These fish are brought in from Arkansas farm ponds once per year in the spring.

Annual Stocking Schedules – Primary Fish Delivery Strategies

With new Community Fishing locations come more adaptable and customized fish stocking strategies. These distinct strategies will be applied to the Community Fishing waters.

“Traditional” strategy: 18 waters in the Phoenix area and 4 waters in the Tucson area will be stocked with catchable catfish or trout from September to June, at roughly 2-week intervals. Catfish shall be stocked 4 times in the fall and 6 times in the spring. We plan for 9 stockings of trout in the winter months, and one sunfish and/or bass stocking in the spring.

	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun
Trout			9 STOCKINGS							
Catfish	4 STOCKINGS						6 STOCKINGS			
Bass and/or Sunfish									1	

“Expansion” strategy: 12 waters in the Phoenix area and 5 waters in the Yuma area will be routinely stocked with catfish or trout from October to June. Catfish shall be stocked once in the fall and 3 times in the spring. We plan for 4 stockings of trout in the winter months, and one sunfish and/or bass stocking in the spring.

	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun
Trout			4 STOCKINGS							
Catfish		1						3 STOCKINGS		
Bass and/or Sunfish									1	

We have additional (custom) strategies such as “Trout Only” at Payson’s Green Valley Lakes, “Catfish only” at Stone Dam near Ash Fork, and a new “Upper Elevation Strategy” for waters in Prescott Valley as well as Patterson Ponds in Saint Johns.

Where to Get More Information

Current information on Program activities and a stocking schedule is prepared every two weeks in the Community Fishing Program Bulletin. Bulletins are posted at Fishing Information Stations at your nearest Community Program lake or they can be downloaded from the Web at www.azgfd.gov. To receive your free copy of the bi-weekly Community Fishing Program Bulletin or the weekly Fishing Report, subscribe under AZGFD e-News.

Basic Fishing Setups

Proper rigging of your hooks, weights and baits is a fundamental part of your fishing success. The following methods have proven to work well for trout, catfish and sunfish in urban waters. Use lighter line and smaller hooks and weights for trout and bluegill. Some baits such as worms are effective for all fish; however, most other baits are species-specific.

NOTE: See the inside back cover for illustrations and a complete checklist of the essential fishing equipment and baits that are recommended for community fishing.

Channel Catfish

Line: 8 to 12 lb. test

Hook Size: 2 to 6 baitholder

Bait: Worms, stink baits, hotdogs, liver, shrimp

14"-18" AVERAGE SIZE

Catfish are best caught using a hook and sinker setup (**fig. 1 and fig. 2**). Catfish bite best in darker environments. Fish the deepest spots during the daytime and shallower areas after dark.

Figure 1:
Egg Sinker Setup

Figure 2:
Split Shot Sinker Setup

Rainbow Trout

Line: 4 to 6 lb. test

Hook Size: 8 to 12 baitholder

Bait: Worms, salmon eggs, Power Bait

10"-12" AVERAGE SIZE

When using prepared floating baits, the bottom fishing set up with an egg sinker is most effective (**fig. 1**). When fishing for trout, use the egg sinker set-up with 2- or 4-pound line tied below the swivel to the hook. Fishing with a bobber (**fig.3**) can work well for trout when using non-floating baits such as worms or salmon eggs. For trout lures, small in-line spinners such as Panther Martins or Mepps, or spoons such as KastMasters or Super Dupers, can be effective.

Sunfish

Line: 2 to 6 lb. test

Hook Size: 8 to 12 baitholder

Bait: Worms, mealworms, corn

5"-8" AVERAGE SIZE

Sunfish or bluegill can be caught using the bobber setup (**fig. 3**). Use a small pencil or round bobber and fish along the lake edges in 4-8 feet of water. Use enough weight below the bobber so that it can be pulled underwater easily. Try to cover up the hook with the bait.

Figure 3: Bobber Setup

Know the difference between these two carp species!

Keep white amur in our lakes. They are helping to keep our waters clean and free of weeds. If caught, please consider releasing them unharmed.

White Amur (also called Grass Carp - Limit 1 fish 30" minimum length)

White Amur (also called grass carp) are weed eating fish specially stocked by lake managers to control aquatic weed problems. They are an important biological tool used to rid lakes of nuisance weeds and algae, helping to reduce or eliminate the need to apply chemicals in the water. Stocked white amur are expensive, certified as sterile, and will not reproduce. These "underwater lawnmowers" are vital to keeping lakes clean, healthy and fishable.

Common Carp (Unlimited harvest)

Common Carp are found in some lakes. They are not stocked, but can reproduce in some of the larger lakes. A variation of the common carp, the Israeli or mirror carp, is found in Tempe Town Lake and is very unique with irregular sized and spaced scales along the sides.

Proper Release Methods

Fish are a valuable resource, and fishing for them is a fun and exciting recreational experience. Fresh fish are also a great source of nutrition. Keeping only what you plan to eat and releasing the rest is good stewardship of this precious resource. By limiting your harvest, and practicing good catch-and-release techniques, you can help preserve the fishery and ensure that fish remain for another day.

Fish can easily die when subjected to excessive handling and poor release techniques. The fish may swim away at first, but likely dies in a matter of minutes or days if it is left out of the water too long, covered in dirt, squeezed too hard, or injured from forced removal of a deeply impaled hook. **The following catch-and-release tips will greatly improve the fish's chance of survival.**

Do's:

Quick hook sets: Avoid letting fish swallow hooks by paying attention to your line.

Quick retrieve: Exhaustion stress can be fatal, the longer you play a fish, the more stress it endures.

Wet hands and a gentle touch: Handling fish with wet hands will help keep their protective slime from coming off.

Keep the fish in the water as much as possible: It is best to unhook the fish while it is still in the water. If you want a picture, have your camera ready to go and limit holding the fish out of the water for too long.

Carefully remove the hook: Grasp the hook firmly and back it out the same direction it went in. Use pliers, a hook removal tool, or grasp the hook at the eyelet.

Quick Release: Gently place the fish back into the water. If it doesn't swim away, you may need to move the fish forward and back under water so oxygen flows over the gills and it can recover.

Don'ts:

Avoid forcefully removing swallowed hooks: If the hook is embedded down the throat, clip the line as close to the eye of the hook as possible. Hooks will dissolve over time. A fish that has a hook pulled out from its throat has less than a 50% chance of survival. A fish with the hook left in its throat has a 90% chance.

Avoid touching the gills or eyes: Holding a fish by the gills can be lethal; these are extremely sensitive and easily damaged organs.

Avoid letting the fish flop around on the ground: A fish can easily harm itself on land and lose some of its protective slime coating. It is best to minimize the amount of time it spends out of the water.

Avoid a firm grip: Fish are slippery and wiggly. Instinct will lead an angler to tighten their grip on the fish, and potentially crush their internal organs with force.

Other helpful techniques may include using barbless hooks, circle hooks, hook removal tools, and rubberized nets for handling fish.

Caring For and Preparing Your Catch

If you're going to eat your catch, you should know how to care for it from the hook to the frying pan. Nothing tastes better than a freshly caught fish. Our urban lakes offer high quality fish that are delicious, nutritious, and an affordable alternative to buying fish from a store.

Responsible anglers catch only what they plan to eat – making sure the fish does not go to waste before it is eaten. Here are some tips to keep your catch fresh and tasty, and avoid having to throw a fish away.

- **A cool, moist place to put your catch.** One of the quickest ways a fish can go bad is by being left in a warm area (on land or in the water). A good solution is to bring an ice chest with enough ice for the trip and immediately place the catch on ice. You can also keep the fish on a stringer if the water is cool.
- **Keep the fish alive until you are ready to leave.** The longer you can keep a fish alive and fresh, the better it will taste when you eat it. Using a wire basket or a stringer is a typical tactic used by most anglers. If using a stringer, thread the stringer through the fish's lower jaw instead of the gills. This keeps the fish alive a lot longer. Once you are ready to leave the lake, place the fish in a cooler or container. When you leave, remember it is against the law to transport your fish alive in water.
- **Clean the fish as soon as you get home, and store it properly:** The sooner you get home and gut and clean your fish, the better it will taste. Once properly cleaned, the fish will keep for up to 2–3 days in the refrigerator sealed in a container. If you need to store it for longer, you can freeze it in water or a ziplock bag and it will keep for 2–4 months.

For tips and instructions on preparing your catch, including gutting, filleting and cleaning your fish, go to www.takemefishing.org. Click on the Fishopedia tab and go to Preparing Your Catch.

Hundreds of recipes for cooking and preparing delicious trout and catfish can be found at www.foodnetwork.com. Enter "trout" or "catfish" in the search box.

Aquatic Invasive Species

Aquatic invasive species in Arizona are defined as “any aquatic species that is not native, and whose introduction may cause economic or environmental harm or harm to human health.” Typically they are moved from lake to lake by common recreational activities such as boating and fishing. When these invaders come into contact with our native, resident species, they often out-compete them for food and territory because there are no natural predators to stop them.

What you can do

- To prevent spreading aquatic invasive species, at the end of every fishing trip make sure to **remove any visible mud, plants or fish** from your equipment.
- **Clean, drain and dry** all equipment before using it again.
- **Don't transport or stock live fish** (or aquatic plants). It's illegal.
- Find out more at <http://www.azgfd.gov/invasivespecies>

Do not move fish between waters or introduce fish to waters from which they did not come. Doing so can have far-reaching consequences, posing threats to resident fish and perhaps infecting waters and spreading disease.

Arizona's Community Fishing Program Most Unwanted Invasive Species:

- 1. Golden Alga** is a one-celled microscopic alga that produces a toxin that can kill fish and clams. It is already found in numerous Arizona waters including some Community Fishing waters in the Phoenix area. The algal toxins are harmless to humans, pets and birds.
- 2. Quagga mussel** is a shelled bivalve that attaches to many different surfaces, natural and man-made. It filters the water through a siphon and eats large amounts of microscopic algae, the base of the food web. A single adult can produce four million larvae (called “veligers”) a year, quickly clogging pipes and blanketing large areas of the lake bottom. Quagga mussels were discovered in Red Mountain Lake in 2012.
- 3. Crayfish** are sometimes used as bait. They consume large quantities of aquatic plants, fish, and even each other. They annoy anglers by stealing their bait.
- 4. Tropical fish** such as *Plecostomus* (alga eaters), goldfish, pacu and even piranhas have been illegally released from fish tanks and ponds. They carry diseases, prey on food items important to sport fish, and may create fear and panic when found.
- 5. Hydrilla and other tropical/aquarium plants** can rapidly infest ponds, becoming a nuisance as they cover the surface or the bottom. Expensive to control, they can be a persistent pest.

Operation: GAME THIEF

A 24/7 hotline to report fish and wildlife violations

Report a violation. Rewards of \$50–\$1,000 are offered for information leading to an arrest for fishing violations. Callers can remain anonymous. Call **1-800-352-0700**.

Bag and possession limits provide everyone with a chance at a quality fishing experience and protect the fishery. Any angler that keeps or gives away more than their limit is breaking the law – they are thieves stealing fish from you and other responsible anglers.

Your help is needed to catch these violators. If you witness an angler keeping more than the daily bag and possession limit, fishing without a license, fishing with more than two poles at the same time, or not complying with other fishing rules, contact the Operation Game Thief Hotline to report the violation.

Reported violations are prioritized based on the quality of the information provided. Because the department has a limited number of wildlife officers statewide, it is not possible to have an immediate response to every call. That is why it is important that you be a good witness so that follow-up by an officer can be conducted.

Be a good witness:

- Recognize what specific activities are violations.
- Do not put yourself in danger or confront the violator.
- Write down the date, time and specific park and lake location.
- Write down a description of the person(s) (physical and clothing).
- If possible, get the vehicle description and license plate number.
- Try to take pictures or video of the violation and violator.
- Call or go online to report the violation as soon as possible.

Poaching is not fishing! Poachers are not fishermen! Do the right thing. Report a violator. Your tip can make the difference in apprehending a fish thief.

Fain Lake, Prescott Valley

Rainbow Trout stocking at Rio Vista Pond, Peoria

Community Fishing Program Waters

This section includes maps and specific information on each of the 45 Community Fishing Program waters located in 21 cities across Arizona.

- Lakes are grouped by city, and key lake and city park information is listed to ensure you have a pleasant and enjoyable fishing experience when you visit.
- Most parks have parking, restrooms, picnic tables, drinking water, handicap access, and much more. Facilities, landscaping and lakes are well maintained by parks staff.
- Community Fishing Program bulletin boards and regulation signs are posted at all lakes to keep you informed of the current fishing regulations and license requirements.
- Enjoy fishing the park lakes. Please help keep your community parks clean and follow the rules and regulations.

Celebrating 34 years of "bringing fish to the people!"

- 21 communities and growing
- 45 total waters with more to come
- New waters in Yuma, Prescott Valley and Queen Creek

MORE LAKES + MORE FISH = MORE FUN!

A woman with short brown hair, wearing a purple long-sleeved shirt and sunglasses, is leaning forward and looking towards a large body of blue water. A young child in a red shirt is sitting next to her, also looking at the water. The water is clear and blue, with some ripples. The background is a vast expanse of water under a clear sky.

“If people can’t get to the fish,
we’ll bring fish to the people.”

WWW.AZGFD.GOV
